中國電業發展前途
謂：前程遠大但須停止戰爭
Vast Potential Wealth of
Hydro-Electric Power
In China Still Untapped

London, (LPS) — The Far Eastern Service of the B.B.C. yesterday broadcast a talk on the electrical industry of China. It was given by D. Maxwell Bristow member of the British trade mission to China who during the missions tour made a special study of this subject.

(天津英新聞處倫敦電)昨日英國廣播公司(B.B.C.)電台，遠東放送部，邀請了前英國商務訪華團團員布斯托伊氏播講中國電業工業問題。伊氏在演講期間曾對這個問題作過特殊研究。

Mr. Bristow speaking of the missions report said "our report seeks to give sufficient information to show the trend of electrical development in China including Manchuria and Taiwan. I think it is no overstatement to say that in the great rivers of China there is a potential development of hydro-electric power amounting to at least 15 million kilowatts or fifteen times the present power plant installed throughout the country. Add to this the unlimited capacity of steam power plants that could be supplied from the vast coal deposits of China and you get a broad picture confirming that electrical development, comparatively speaking, has not yet emerged from its embryonic stage."

伊氏談到了該團的報告說：「在報告裏，我們盡力供給了中國（包括東北和台灣）電氣業發展的情報，如果說在中國的河流裡儲藏着一千五百萬瓦的電力（約當全國全境現在電力的十五倍），這非過言。此外，由於中國之疆域極大，將來火電的發電量，也必無窮。」綜合來看，遠量是很好的；只是目前的發展還未脫離形而而已。

"Of course not all of this great source of power can be made of use economically. But if even only one tenth of it could be made available now it would bring an immense improvement to the welfare of the Chinese people and to the country's industrial productivity. Agricultural communities of Szechuan for example would benefit enormously by the damming of the Yangtze river, first and foremost, because of the extensive irrigation of the soil; secondly because of the new industries that would be attracted to the provings by a supply of cheap electric power and thirdly by the improvement of facilities for navigation of the Yangtze itself."

「當然，這一偉大的力量源泉，未必全能在經濟上予以利用。不過，只要利用其十分之一，就可以增進人民的福利，並能提高工業生產力。只就四川省而言，如長江能架橋，就可收到勝利。此外，廉價的電力可以助長該省新工業的成長，而改良水道又可助長航運的便利。」

「But unfortunately that picture of plenty looks like remaining only in the imagination for some time yet.」

「但是，不幸，這幅豐盛的畫景，在最近還不能實現。」

The pre-requisites to progress and prosperity are firstly the termination of civil strife so that people and their government can devote their sole attention to planning the future; secondly a sound finance with which to carry out those plans, and finally the sympathetic help and advice of other nations in giving China the benefit of their experience and lessons of their mistakes.」

「中國的繁榮和進步，有三個先決條件：第一，須停止內戰；第二，須有健全的財政基礎；第三，須有外國的同情和援助。」

Bogota, Apr. 22. (Reuter) — Mr. George Marshall, United States Secretary of State, has told the Pan-American Conference meeting here that his delegation would not take part in any action on the question of European-held colonies in the Western Hemisphere.

路透社巴哥大四月二十二日電：美國務卿馬歇爾會於此間泛美會議上聲明，美代表團將不參加任何有關西半球歐洲殖民地問題的行動。

"The United States must refrain from supporting any resolution which might appear to prejudice conflicting claims of interested parties," he said last night.

葉時曉又稱：「美國必須約束自己不去支持對有關方面不同要求有任何障礙之處理辦法。」

At the opening of the session Venezuela had proposed that a special commission should be appointed to investigate the colonial problem.

會議開始時，委內瑞拉代表直接提出一特別委員會以調查殖民地問題。

The conference appointed a working party composed of Argentina, Brazil, Chile, Cuba, Guatemala, Mexico, Uruguay, Colombia and Ecuador to make the investigation.

會議委派一工作委員會專司此事，此一委員會由阿根廷、巴西、智利、古巴、瓜烏拉尼、墨西哥、烏拉圭、哥倫比亞及厄瓜多爾等國代表組成，以進行調查。

(b) Defeated on all sides, his courage began to fail.

各方皆敗，彼之勇氣開始沮喪。

In (a) the construction can not be defended, although it is not uncommonly used. It would be correct, if we added the words "by us" at the end of the sentence, because the participle "having stated" would then qualify the pronoun "us".

於(a)句中其組織雖常有然莫可為之辯護，若加"by us"於句尾，則此句為正確，因分詞"having stated"於是乎形容代名詞"us"矣。

In (b) the construction, besides being very common in practice, is defensible; because "his" of him, and "defeated" qualifies the implied pronoun "him".

於(b)句中其組織不但極普通，且可為之辯護，因"his" = 他的，而"defeated"形容暗示之名詞"him"。

一個人經驗愈多，他和世界的直接接觸也愈多，生活也更加豐富和更有趣義，同時處世的能力也格外增強。假使我們遇到了新的經驗，就此退縮，我們不僅永遠不會發展，並且也失却了很多的樂趣，所以，要捉住面前每一個機遇，而設法將其善為利用。

Some of the radio-isotopes, Noting the growing importance, however, swiftly lose their of isotopes for medical radiation power, Iodine-131, for example, loses half of its radiation power every eight days. Sodium-24 also is short-lived. Such isotopes must be live for nations seeking radio-isotopes from the United States for research and the cancer program in the therapy. The U.S. Atomic Energy Commission makes radio-isotopes available to all legitimate research centers in the world. During a recent six-month period, 44 shipments were made to eight countries. Conditions for such scientific publication of results and freedom of laboratory visits for scientists of all nationalities.

雖然如此，但有些放射同位素的放射力消失的很快，如碘—131，每八天即喪失其放射力之一半；鈉—24的壽命也很短促，這種同位素，必須空運或僅能在短暫距離內輸送為了便利的研究工作的進行，美國的原子能委員會，正準備把這種同位素（除船外），免費向需要的地方運送。

The atom attack on cancer is to be developed as rapidly as possible. At New York City's Memorial Hospital and at the Universities of Rochester (New York), Harvard (Cambridge, Massachusetts) and California (Berkeley), AEC-sponsored projects already are under way. Cancer research facilities will be established at major AEC atomic laboratories for the benefit of private research institutes and hospitals. While AEC will provide the facilities, studies will be carried out by scientists independent of AEC.

一般希望原子治療法會有很好的發展，原子能委員會在紐約市紀念醫院和羅徹斯特（哈羅）州、哈佛大學朱塞斯劍特研究所及加里布尼亞（在貝克萊地方），各大學主持之計劃已在進行，美國原子能委員會所屬各大型原子能實驗室爲了私家研究機關及醫院研究的便利都要安置此研究設備，這項設備雖是山東省研究委員會準備，但是研究工作却要由不屬於原子能委員會的科學家來實行。
